Notice of Upcoming Construction Works

No.2 Linkspan Area

Kia ora,

We are writing to inform you of **upcoming construction works** in the No.2 Linkspan area at Port Marlborough as part of the Waitohi Ferry Redevelopment Project (WFRP).

Work dates and hours

Works are scheduled to take place from **mid-June to early August 2026**, between **7:30am and 6:00pm, Monday to Saturday.** No night works are planned.

What work will be undertaken?

The following activities will occur during this period:

- Construction of a temporary earth bund and infill of the No.2 Linkspan void
- Demolition of linkspan foundations, including removal of existing piles

Please refer to the **map** below showing the work area.

What effects might you notice?

Concrete breaking and pile extraction will generate construction noise and may result in some vibration. These activities will occur intermittently during daytime hours, be planned around ferry operations where required, and will comply with permitted limits.

Some minor dust may be generated from earthworks and material handling.

How impacts will be managed

Ferry and port operations

- Site access will be via the Interislander commercial vehicle entrance until the Waitohi Domain access route for the WFRP becomes operational in late June
- Pile extraction works will temporarily pause when ferry passengers are using the walkway or works are adjacent to ferry access roads with queuing traffic

Learn more at: https://portmarlborough.co.nz/waitohi-ferry-redevelopment-project/

- All works will remain within a designated construction area to minimise disruption, with traffic scheduled outside ferry operation times where possible and no changes expected to access for authorised personnel within the port operational area.

Environmental controls

To protect the surrounding environment:

- A silt curtain will be installed in the water prior to bund construction
- Daily pre-construction wildlife checks will be completed
- Active dust suppression will be in place

Services

Any required electrical relocation works will be carefully staged to avoid disruption. No impacts to existing services are expected.

Keeping you informed

If works change or if activities with the potential for increased effects are planned, further notification will be provided.
