Waitohi Ferry Redevelopment Project – Commencement of Enabling Works

Dear Neighbours

This notice is to advise that from **Monday 10 November 2025**, a team from HEB Construction will be onsite at Waitohi Picton to prepare for the de-construction of the Vehicle Access Bridge and Linkspan connecting with the Long-Arm 2 Wharf. This work is part of the enabling works required before new marine infrastructure is constructed to support two new Interislander ferries.

The work will be carried out within a confined area (as shown below), done in stages, and continues for the remainder of the year through early 2026.

Thank you for your patience.
